

Elevator Pitch

Team: Olalekan Abdulsalam, Kevin Kraiss, Caleb Wisneski, Kyle Johnson

Our group has decided to create the app requested by Nate Lundt for Reeve Union Operations. This app is needed to streamline a process that could increase the efficiency at which Student Building Managers, who would mainly be using that app, are able to complete daily logs. Some specific features it would have are displaying a list of events in the building, displaying staff working that day, allowing users to complete daily forms, allowing users to upload pictures along with the forms, and archiving these forms. This app would have to be functional on phones as well as desktops. Our group has decided to meet weekly on Sunday, and we are currently looking at schedules to find another day we have availability. We will primarily be communicating using Discord.
